# Job Advertisement Stellenausschreibung

---

## C++ Software Developer Windows (m/f/x)

## Position summary

Your main task will be to design and develop technical products, core components (applications, libraries, system services, user interfaces, and system programming) and integrate 3rd party SDK for Microsoft Windows platforms using modern software engineering methods within an independent agile feature team.

We're a small team, part of a technology startup with experienced people in the security industry.

## Your profile

The ideal candidate will be dedicated, work independently, and have a roll-up-your-sleeves mentality.

- You will enjoy implementing high-quality software by using modern methods to develop the software and will be a competent user of C/C++, including C++11 or later language standards
- You have worked with TFS or Github
- You are familiar with one of Python or Perl
- You are expert in working with Visual Studio
- Our development process is based on agile methodologies, like Scrum. You are proficient in "Unit Testing", "Pair Programming", "Test Driven Development (TDD)"
- You are well organized, efficient, and highly results-oriented
- You are fluent in English and, ideally, you understand and/or speak German.

Nice-to-have:

- Cross platform software development
- C# language
- HTML, Python, Perl, Javascript language

## Our offer

- Professional challenges to match your interests and skills Cutting-edge IT infrastructure
- Flat hierarchies and fast decision-making
- Stimulating work environment
- Flexible working hours and locations
- International team
- Attractive salary

## Location

This job is based in Germany in Saarbrücken. Please send us your application stating your salary expectations and the earliest possible starting date by e-mail to our HR [hr@tuxguard.com](mailto:hr@tuxguard.com)
